# Application

Suitable for Numerous  
Using Scenarios

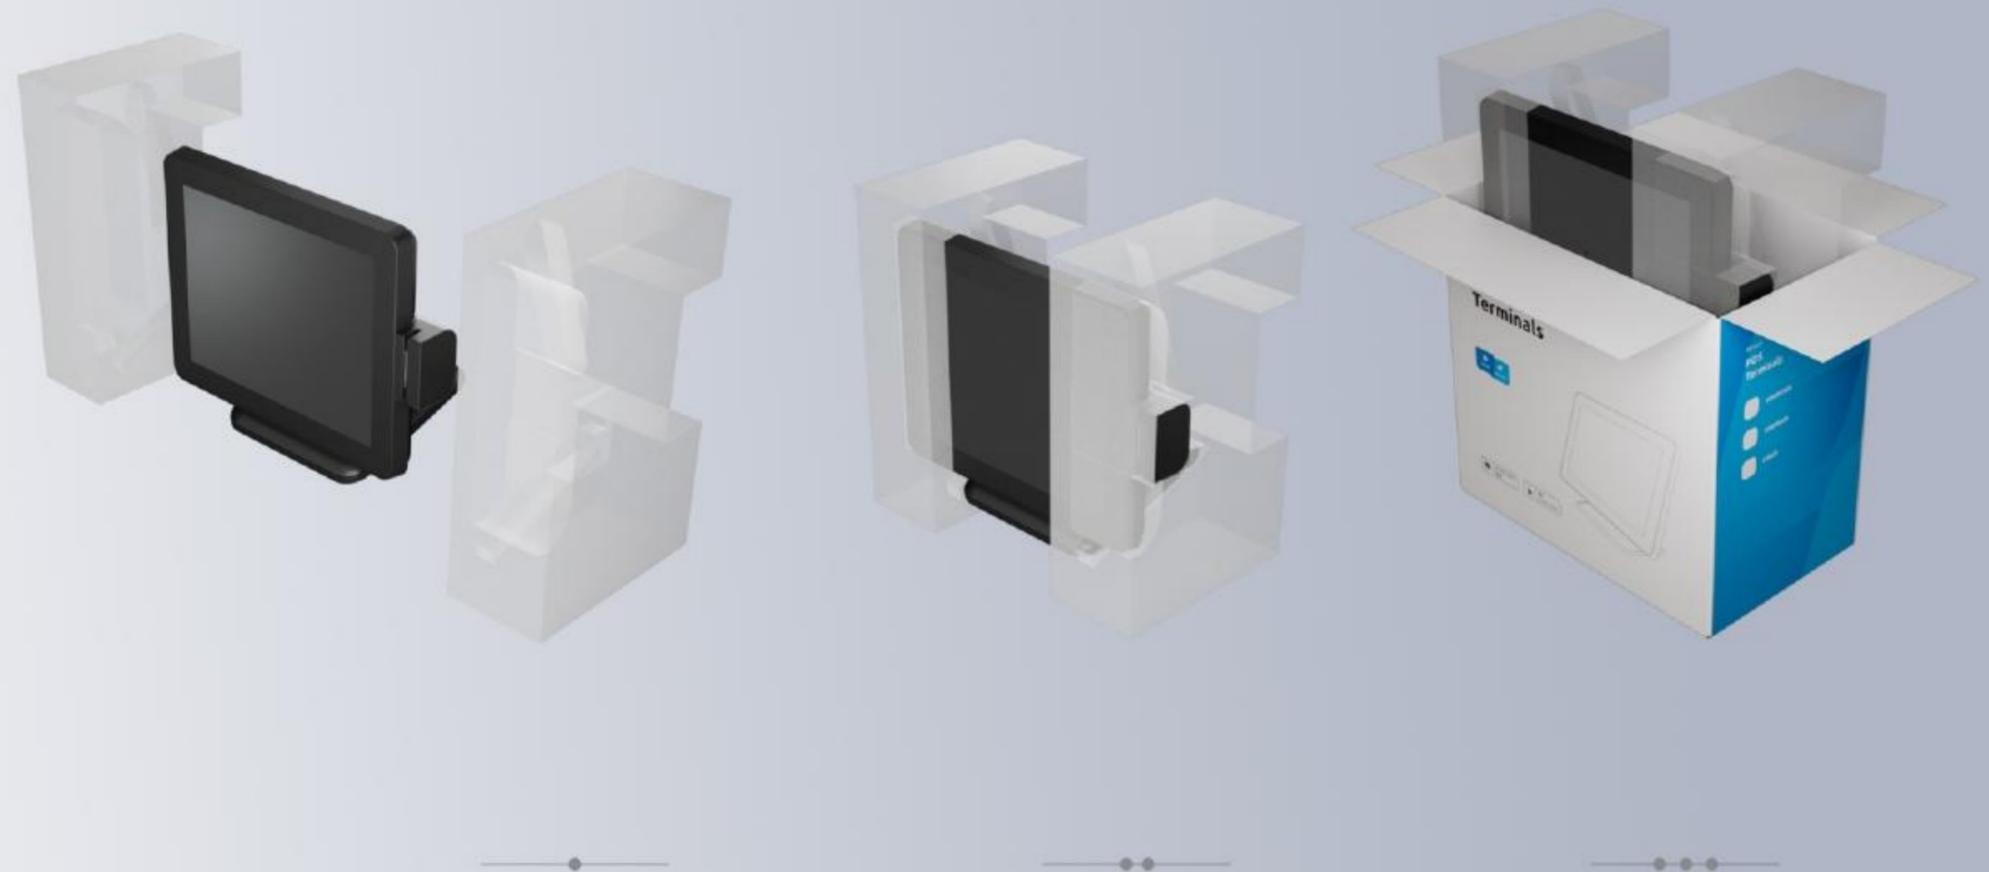

The 15-inch POS terminals could bring extraordinary using experiences to where they are installed. Whether it is catering, retail or other application scenarios, they will effectively improve work efficiency.

# Packaging

## Over All Protection

To ensure the highest standards of product safety, each device in the POS series is packaged individually with precision-engineered protection. High-density shock-absorbing EPE pearl cotton is used to safeguard the product during transportation. In addition, all units undergo rigorous simulated drop tests from heights ranging from 1 to 3 meters. TouchDisplays is committed to delivering products with superior durability, ensuring peace of mind and maximum reliability for our customers.
