Excellent Display

Clear and Crisp
Touch Panel

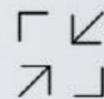

With stunning picture quality, this 15.6 inch POS system is equipped a powerful and mainstream touch panel to make all content displayed with sufficient clarity.

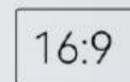

15.6"
TFT LCD PCAP Screen

250
Nits Brightness (Customizable)

1920*1080
Resolution

16:9
Aspect Ratio

Full HD Resolution

Superior Image Quality

The performance of the panel plays a practical and functional role in content display. Full HD resolution makes everything displayed ultra-clear, to realize prompt and accurate information interaction.

Portrait Mode

Customized Rotatable Stand

Based on the modernized touchscreen operation habit, the demand for supporting both landscape and portrait modes is considered during the product design period. 90-degree left and right rotation makes it flexible and easy to use.

Smooth True-flat Screen Design

No Bezel, No Restriction

Concise edge-to-edge touchscreen contributes to the fashionable machine appearance.

10 Points Multi-touch

Fast and Efficient Business
Processing

Best-in-class service speeds at all times. More touch points represent a more efficient operating experience.

IP65 Waterproof

Excellent Front Screen Protection

Features an IP65 waterproof and dustproof front panel to protect the screen from water corrosion, and enhance service life.

Flexible and Adjustable Screen Angles

Improve The
Practicality

Designed for comfortable user experience.
Optionally adjustable viewing angle will meet
various user requirements.

Extended Display

Focus on Practicality

Brings a new dimension brings a new dimension to the operation and information display of the device, while bringing users a richer and more efficient information interaction experience. At the same time, with the customer display can also effectively hide the cable, not only reduce the cable wear, but also to achieve a neat and tidy effect.

Ingenious Cable Management

Elegant Office Space

—

To hide every cable of connection, the crafted hidden-cable design is integrated into the stand to make the POS surrounding area neat and tidy.

Hard Disk Swapping and Maintaining

Quick-Release Technology (Optional)

Built for unmatched work and ready for efficient maintenance process. Unscrew with fewer restrictions, the hard disk can be easy to remove from the mounting tray and silky slide into place. Flexible swap design lets products run at peak efficiency all along.

Application

Suitable for Numerous
Using Scenarios

15.6 inch POS terminals are suitable for many occasions, mainly used in cashier work and terminal operation. Elegant and stylish appearance elevates the style of working places. They are easy to improve the work efficiency of employees and maintain the overall state of operation.

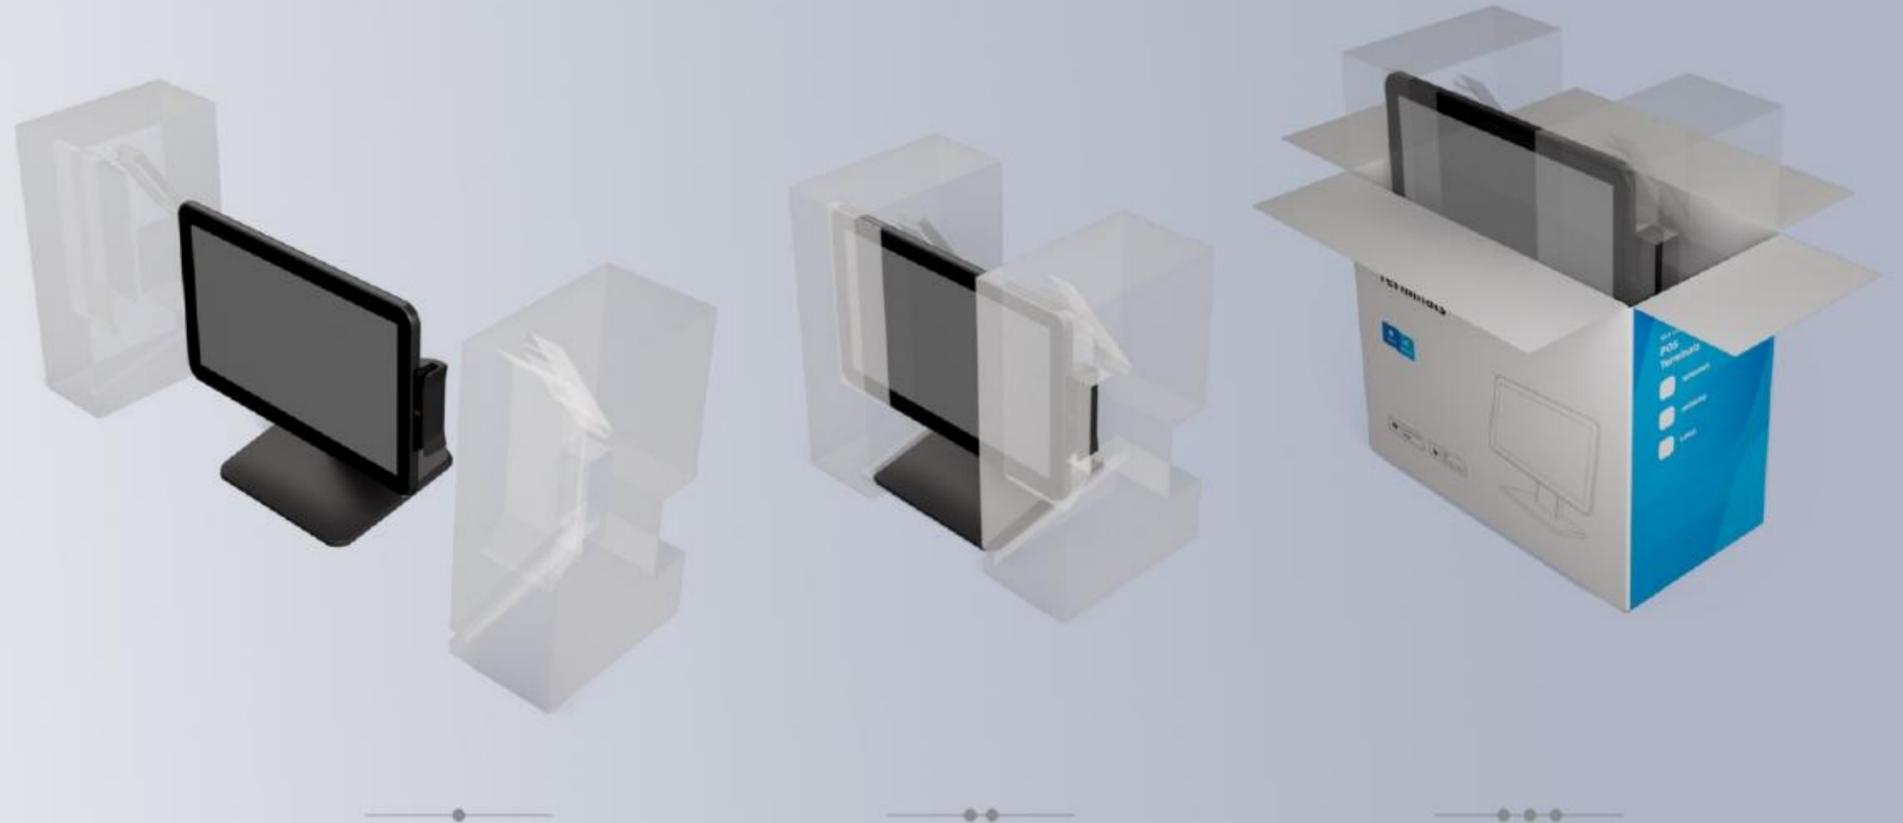

Packaging

Over All Protection

—

To ensure the highest standards of product safety, each device in the POS series is packaged individually with precision-engineered protection. High-density shock-absorbing EPE pearl cotton is used to safeguard the product during transportation. In addition, all units undergo rigorous simulated drop tests from heights ranging from 1 to 3 meters. TouchDisplays is committed to delivering products with superior durability, ensuring peace of mind and maximum reliability for our customers.
