Product Overview

Elevated Refinement

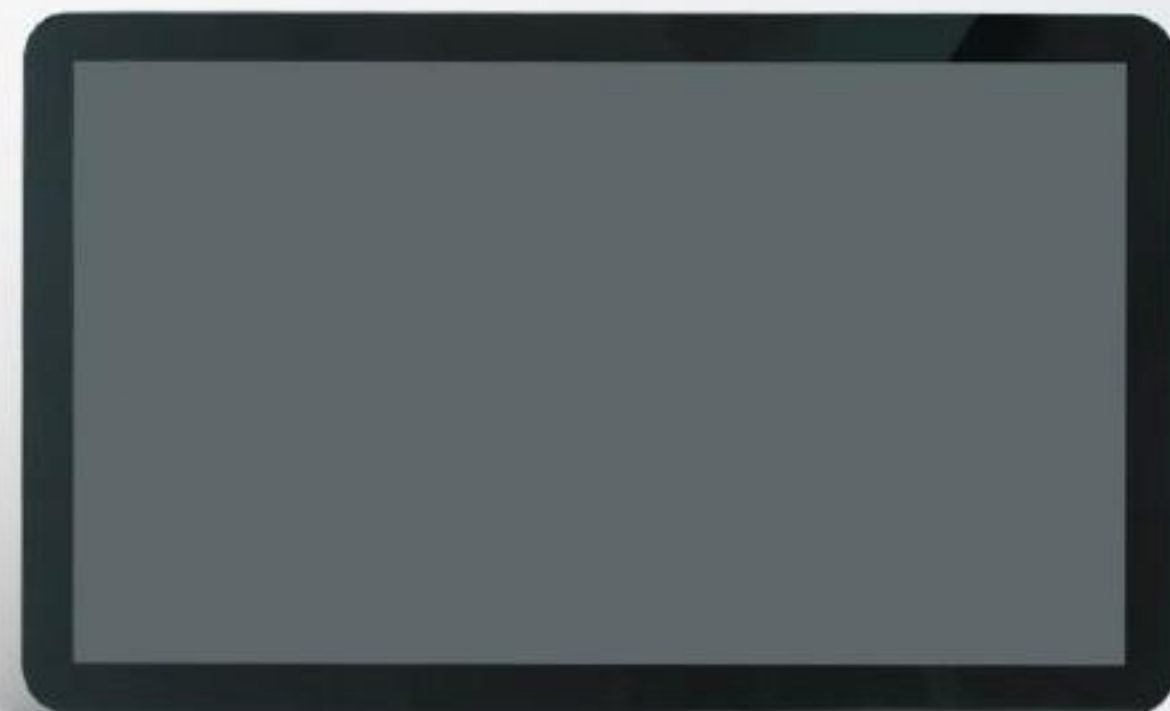

Open frame touch monitor is a specialized product solution that is designed to solve the customers' demand for customized products. This product can provide customization services based on customers' requirements from various aspects, including but not limited to appearance, module, and function.

Product Show

Stunning Displays,
Multi-size Options

For inside-out sophistication, TouchDisplays concentrates on manufacturing top-rank touchscreen products all the time.

Product Features

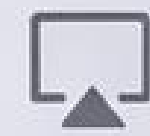

Find the Unique Excellence

Water and dust proof

Support 10 points touch

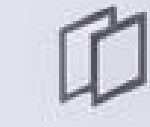

Zero-bezel & screen design

Landscape and portrait mode

Anti-glare technology (optional)

Metal back shell

Support ODM & OEM

Flexible installation options

2 years warranty

4K UHD (Customizable)

Natural and Realistic Picture Quality

Upscale to ultra-high-definition resolution, Touch Monitor series products can easily achieve lifelike image display. Perfect from the details, take you to enjoy the immersive cinematic content.

Multi-touch Functionality

Make Touch Operation a Breeze

—

Get fast click with 10 points touch technology. Every fingertip touch is captured in time, and the extremely fast touch response time ensures a positive and stable running state.

Convenient Operation Buttons

A Handy Way of Interaction

Combining traditional and modern interactive instructions to make the machine run more competently. Operation buttons provide users with more efficient adjustment and maintenance methods, making all operations one step faster.

Metal Back Shell

Low-profile High-quality

—

Supremely durable metal material coupled with a concise outer housing design to achieve reliable and robust physical protection. Preventing environmental and man-made wear and tear, it stays in consistently high performance.

Built for Infinite Possibilities

Landscape and Portrait Modes

Two available modes for easy multi-directional operation. Being designed for modernized touchscreen operation habit, the Touch Monitor has both landscape and portrait modes to realize more possibilities.

Standard VESA Holes

Vary with the
Machine Size (75, 100, 200, 400mm)

Featuring various customization options and expert performance, TouchDisplays Touch Monitor is fully equipped with a flexible mounting design to ensure efficient and steady installation and is perfectly applied to a wide range of scenarios.

Application

Suitable for Numerous Using Scenarios

Touch Monitor is a diversified product that could be given infinite possibilities by customers. From public information equipment to gambling gaming machines, it is designed to satisfy the specialized demand and will create unique value to where it is installed.

Packaging

Over All Protection

The packaging is designed exclusively based on the product. TouchDisplays focuses on maintaining product safety and protecting customer rights. Meanwhile, the products will be performed a simulated dropping test (1m~3m). TouchDisplays insists on playing an important role in the safety of goods transportation.
